# About us

We are a multidisciplinary development team, experts in the realisation of digital projects and customised software solutions for our clients.

Our company is located in Tenerife, formed by an international team led by German and Swiss executives.

# What are we offering?

Building websites, eCommerce and applications.

Development and integration of services through APIs.

Implementation of web design following UI and UX principles.

Creation of specific plugins for your CMS.

Extend and customise functionalities of information portals, forms, landing pages, user management, mailing, etc.

# Medano Solution S.L.

## On demand development

We will advise you to find the best technologies and develop your own software solutions that are perfectly adapted to your needs in terms of time, form and budget.

## We work with you!

Our developers will assist your team and carry out the programming and integration work based on your guidelines and the needs of your projects.

# Tech offer

## Web Applications

We use React as the core of our stack to build PWA and native applications for desktop and mobile devices.

## CMS

We develop custom plugins and themes for WordPress, extending its functionalities and taking advantage of their potential for usability and SEO/SEM

# How we work?

We develop fully customisable websites and scalable applications working closely with your team. We will take care of the programming work that you need to outsource.

All work is carried out entirely by our staff in compliance with the GDPR regulations.

We don't subcontract other companies, so we have full control over our workflow, achieving high and robust quality standards.

Working with our European clients has allowed us to grow and meet the needs of retail, design and digital marketing agencies, specialising in the best front-end and back-end technologies for these sectors.

idea    planning    strategy    success

# References

We have the pleasure of collaborating with a wide range of companies and projects, experiences that helped us to broaden our technological scope and improve our production processes.

Together with our partners, we put in place effective workflows, where good communication and organisation of competencies result in high quality websites and applications, true to what our partners and their customers want.
